Problems rising during programming procedure

After having inserted and supplied the Smart Reader, if **Red** led flashes instead of **Green** led:

There is NOT a good communication

What to do?

- Unplug the machine.
- Disconnect Smart Reader from the serial port.
- Pull out the Smart Card of Smart Reader.
- Clean the Smart Card.
- Repeat again the procedure.

If **Red** led fixed lights up at the end of the download phase (when the **Green** led stops flashing):

Download KO

What to do?

- Unplug the machine.
- Disconnect the Smart Reader from the serial port.
- Repeat again the procedure.
